Hello OSCs.

Can one of you help me answer a few questions about the site status?

1. I am trying to document which homes have methane treatment systems and which ones have methane vents (and which have both). Is there a record of that information? I already have the property owner cross reference and the comments which statement, "has Cabot treatment shed," but I am not certain that list is complete. There are some homes that appear to not have methane treatment and still have an explosivity hazard (see attached).

2. Did anyone map out the results and conduct any geo-referencing of the data? I will try to do this (internally, as in ATSDR) if isopleth maps haven't been created yet. I feel like this could really be helpful in understanding this large data set (or not!)

Thanks,
